● Login to admin-dt.convoso.com // Add assertion you are logged in.
  (Login and password are listed below in the requirements section on the last page.)

● Go to Call-Center -> "DNC" section.

● Click on Upload DNC button // Make sure you are redirected to the DNC upload page.

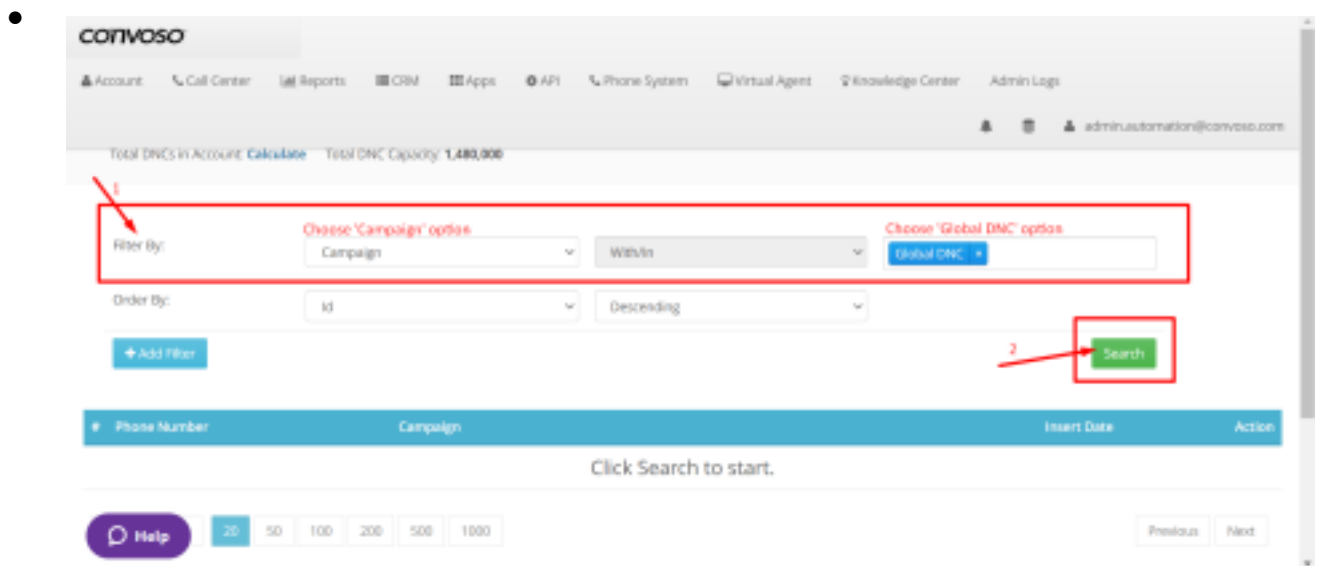

● At the bottom of the page you can see the 'Add Single Number' section.

Add 10 different numbers one by one, with "+1 United States" as country code and "Global DNC List" as "Campaign".
(The list of numbers is listed below in the requirements section on the last page.)

// Check if all the numbers have been added successfully.

-

Move back to DNC manage page (Call Center -> DNC) and search for this numbers

(Filter By: "Campaign" With/In "Global DNC" Option).
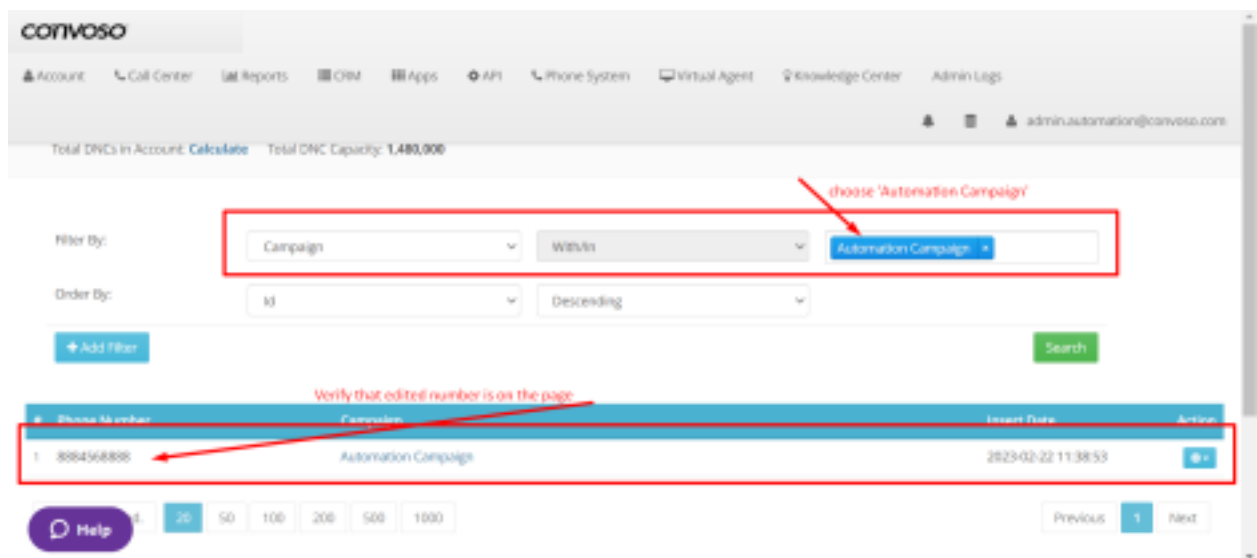

// Confirm that given numbers are displayed.

● Click on "Edit" the penultimate number from the list. (Second from bottom)
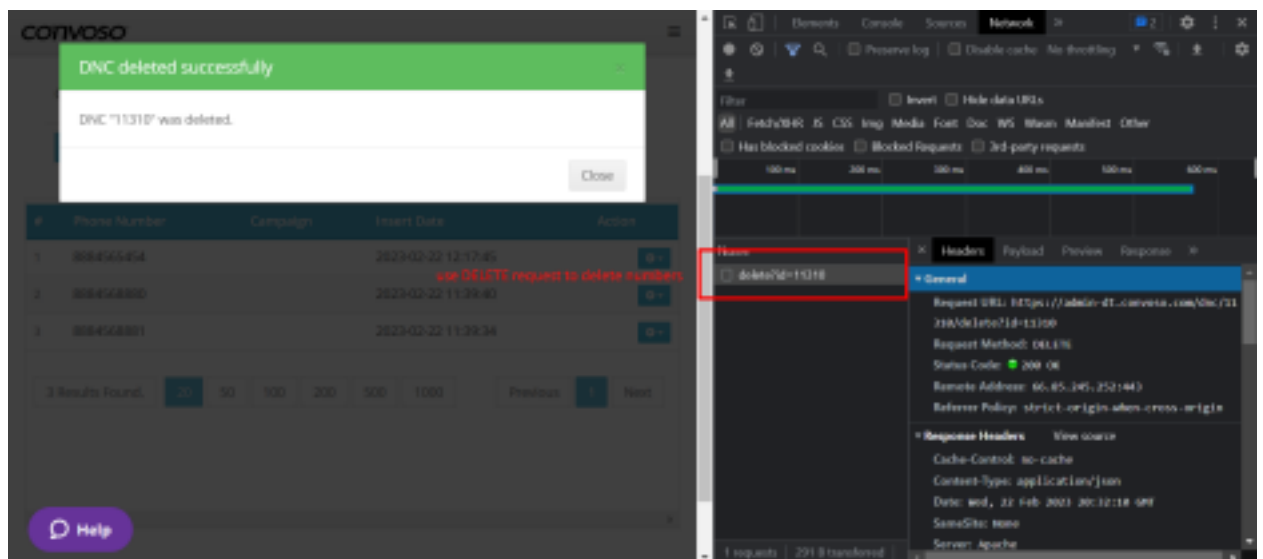

Change number to 8884567777. Assign number to campaign "Automation Campaign".

● Move back to the DNC manage page and search with Filter By: "Campaign" With/In "Automation Campaign".

// Check that the number can be found and also that the settings have been changed.

- Perform the removal of these numbers via the internal API request in the after-hook. (You can find the corresponding request in the network when deleting/searching numbers through UI).

See requirements below.
Requirements:
- All code must be in one it() block.
- Push the project to github. Do not hardcode credentials and don't push it to github, send it as a separate file, for example.
- Add additional assertions of your choice.

  List of numbers:
  8884568889
  8884568888
  8884568887
  8884568886

8884568885
8884568884
8884568883
8884568882
8884568881
